

1. Datos de Contacto:

Nombre: Marcia Gaete

Cargo académico: Profesor Asistente

Departamento o División: Departamento de Anatomía

Nombre de su laboratorio : Laboratorio Embriología

Ubicación del Laboratorio: Alameda 340, 7mo piso Edificio Escuela de Medicina

Mail: mgaetec@med.puc.cl

Anexos:3684

2. Líneas de Investigación:

As a former researcher in Dr. Abigail Tucker's laboratory at King's College London, my group is interested in the mechanisms controlling embryonic craniofacial morphogenesis and regeneration. Our projects and collaborations includes the following topics:

- tooth development and regeneration in animals with different tooth replacement capabilities (i.e. mouse, snake, frog)
- the role of epithelial stem cells in the development of teeth and salivary gland
- explant culture from craniofacial organs
- microanatomy of the embryo, 3D reconstruction and 3D printing

3. Proyectos de Investigación:

Fondecyt Initiation Into Research 2014

"Role of Hyaluronan during tooth development and regeneration"
